OBJECTIVE

Computer Engineering student at Mansoura University, Computer and Control Systems Department, seeking a Backend Developer position where I can apply my skills in .NET development and build scalable backend systems while improving my technical experience.

EDUCATION

Computer and Control Systems Engineering 2028
Mansoura University – Faculty of Engineering
Expected Graduation: 2028

COURSES

Professional Backend Development Diploma (.NET Track) | Route Academy 2025

- Completed an intensive Backend Development training program covering C#, OOP, LINQ, Entity Framework Core, MVC, and Web API with hands-on practical implementation.
- Built and applied multiple backend projects using ASP.NET technologies, focusing on clean code principles, database design, and API development.
- Gained strong experience in software development fundamentals including problem solving, object-oriented design, database management, and real-world backend application architecture.

PROJECTS

E-Commerce RESTful API (.NET)

- Built a scalable RESTful API using ASP.NET Core.
- Implemented secure JWT authentication and Role-Based Access Control (RBAC).
- Designed sophisticated shopping cart logic, product catalog management, and simulated payment integration.
- Connected application with SQL Server database and implemented CRUD operations efficiently.

TaskFlow Management API (.NET)

- Developed a collaborative task management API utilizing Clean Architecture.
- Integrated SignalR for real-time updates and notifications across clients.
- Managed data access and relationships securely using Entity Framework Core.

Smart Booking System (.NET)

- Created a robust reservation system for managing appointments and resources.
- Applied data caching with Redis to optimize query performance and reduce server load.
- Automated email scheduling and notifications for booking confirmations.

SKILLS

Backend Frameworks	Databases & ORM	Architecture & Concepts	Tools & Version Control
- Microsoft .NET (C#, ASP.NET Core)	- SQL Server	- Clean Architecture	- Git & GitHub
- RESTful APIs	- Database Design	- OOP	- Postman
	- Entity Framework Core	- SOLID Principles	- Visual Studio
	- Redis Caching	- Data Structures & Algorithms	

LANGUAGES

Arabic — Native/Bilingual

English — Proficient
